

"Outraged that our ITNJ Chief Justice has been attacked so viciously in Melbourne"

When Sir John Walsh of Brannagh relinquished his practice as an international barrister-at-law in 2015 to be appointed to the post of Chief Justice to the International Tribunal for Natural Justice at Westminster Hall on the 800th Anniversary of Magna Carta. little did he know that five years later he would be attacked in a most vile way by certain elements using dupes to mask their vicious and unprincipled conduct. What had Sir John done? The answer starts with the Judicial Commission of Inquiry into Human Trafficking and Child Sex Abuse which he conducted at Westminster three years later and which is still functioning.

The Inquiry brought to the light the activities of paedophiles and their abuse of young children in various countries of the world. This resulted in many arrests and changes in the law to better protect children and to destroy paedophile rings. This met with public support but brought the ire and hatred of the PIE network of paedophile judges and senior politicians who are part of the Paedophile Information Exchange. What the attack on Sir John included apart from the death threats and intimidation of his staff was to manufacture a bogus bankruptcy against him without any notification and to send the fraudulent court order to his

bank and other entities resulting in seizure of his bank accounts and cancellation of his credit cards and the start of malicious gossip in the community.

One might ask, ***“how can this happen in Australia”?***

Why Australia? As one observer said Australia regrettably is now a country where you do not need to pay a lawyer to do your dirty work when you can buy a judge! Unfortunately, paedophiles are now common in certain branches and states of the judiciary. This is appalling and detrimental to the straight judges and politicians but they have done nothing to stop the encroachment of these vile creatures. Our group is supporting The Chief Justice who will continue with the Judicial Inquiry and to protect his safety, we have now engaged a bodyguard team and a team of support staff to assist in this vital work. Please join us by donating to help him.

Thank you,
